City of Chicago

- Find a testing site: <https://coronavirus.illinois.gov/s/testing-sites>

CDC Guidelines

Who should get tested for current infection:

People who have symptoms of COVID-19 (Fever or chills, cough, shortness of breath or difficulty breathing, fatigue, muscle or body aches, headache, new loss of taste or smell, sore throat, congestion or runny nose, nausea or vomiting, diarrhea)

- People who have had a known exposure to someone with suspected or confirmed COVID-19.
- People who are fully vaccinated should get tested 3-5 days after exposure, and wear a mask in public indoor settings for 14 days or until they receive a negative test result.
- People who are not fully vaccinated should quarantine and be tested immediately after being identified, and, if negative, tested again in 5–7 days after last exposure or immediately if symptoms develop during quarantine.
- People not fully vaccinated with COVID-19 vaccine who are prioritized for expanded community screening for COVID-19.
- People not fully vaccinated with COVID-19 vaccine who have been asked or referred to get testing by their school, workplace, healthcare provider, state, tribal, local external icon or territorial health department.

Who does not need to be tested

The following people who have been exposed to someone with COVID-19 do not need to get tested if they do not have COVID-19 symptoms:

- People who have tested positive for COVID-19 within the past 3 months and recovered, as long as they do not develop new symptoms, do not need to get tested.
